A cross-sectional diagram of a liquid crystal display assembly. It shows a substrate 1400 with a top surface 1402a and bottom surface 1402b. A layer 1406 is on the top surface, containing a central area 1409. A thin layer 1408 is on the bottom surface. A thick layer 1411 is at the bottom edge. The interior space is filled with a material 124. A gap or channel 1410 runs along the right side. At the bottom center, there is a protrusion 1412 and a recessed area 1414.
